SUMMARY

Computer Science student at the University of Islamic Sciences and graduate of 42 Amman. Skilled in C, C++, React, and frontend development, with experience in systems programming and algorithms. Passionate about building efficient software, solving complex problems, and continuously learning new technologies. Strong problem-solving skills with experience developing real-world projects.

PROJECTS

Ft_transcendence | Full-Stack Web Application

- Developed a real-time multiplayer web application as part of a team project.
- Implemented user authentication, profiles, and interactive gameplay features.
- Built and integrated frontend and backend components with database support.
- Focused on real-time communication, API integration, and scalable web architecture.

Minishell | Unix Shell Implementation (C)

- Developed a Unix-like command interpreter in C that mimics core Bash functionalities.
- Implemented command parsing, built-in commands (cd, echo, pwd), and external command execution.
- Supported pipes, I/O redirections, environment variables, and signal handling.
- Managed process creation, file descriptors, and memory for interactive shell sessions.

Inception | Docker Infrastructure Project

- Designed and deployed a containerized web infrastructure using Docker and Docker Compose.
- Configured multiple services including NGINX, WordPress, and MariaDB in isolated containers.
- Managed networking, volumes, and environment variables for secure and persistent deployment.
- Automated service orchestration and ensured reliable communication between containers.

Learning Management System Database | MySQL

- Designed and implemented a comprehensive MySQL database for an e-learning platform.
- Modeled users, courses, enrollments, lessons, assignments, and quizzes with proper relationships.
- Developed advanced queries for analytics, progress tracking, and reporting.
- Ensured data integrity with constraints, indexes, validation rules for a production-ready system.

EDUCATION

Bachelor's in Computer Science

Oct 2023 - Present

[World Islamic Sciences University](#)

Diploma of Software Engineering

Aug 2024 - Mar 2026

[42 Amman](#)

SKILLS

Programming: C, C++, Java, JavaScript, SQL

Web: React, HTML5, CSS3, Tailwind

Databases: MySQL, PostgreSQL, MariaDB

Tools: Linux, Git, Docker, Bash, Nginx

Concepts: Data Structures, Algorithms, OOP, Multithreading

LANGUAGES

•Arabic (Native)

•English (Good)
